Knead Help?

**Qualifies for IRS
Section 179 Tax Savings**

A new Bloemhof moulder can help you increase productivity and reduce labor cost, while maintaining the quality and consistency of your finished product

The **EXPRESS 300** has been specifically designed for high speed production and to help reduce labour costs. The unique design allows the machine to be fed directly from a single or multi pocket divider, up to 8 pockets and a capacity up to 12,000 pieces per hour. Dough pieces are sorted into two rows for efficient and versatile production.

The four roller system maintains consistent, quality moulding. The **EXPRESS 300S** version incorporates Bloemhof's low stress sheeting system with patented spring loaded roller technology and is suitable for long fermentation and high hydration doughs. The twin pressure plate system with extra long plates that are gentle on the dough forms roll products from 3" to 12" in length with full side guide control for a seamless finish.

Telescopic legs adjust infeed height from 21" to 34" for multiple sorting options. The optional outfeed conveyor allows sufficient time for manual panning or can be integrated with your panning system.

BLOEMHOF EXPRESS 300 & EXPRESS 300S Moulder Specifications

Model:	EXPRESS 300	EXPRESS 300S
Motors:	208/230V, 60Hz, 3 PH	2½ HP
