

CFM 118

Newly designed with ergonomics and ease of use in mind, the CFM 118 is more efficient than ever. A powerful vacuum, especially for its small size, with a wide range of accessories, makes the CFM 118 ideal for use in multiple applications.

The CFM 118 combines powerful suction and outstanding filtration in a compact, portable design.

The wheeled collection container is easy to remove, lift, carry and empty.

Powerful vacuums. Proven solutions.

SPECIFICATIONS

CFM 118

Voltage @ 60 Hz.	volts	120	Filter area, main	sq. ft.	7.53
Type of power	no. of phases	single	Filter area, HEPA	sq. ft.	11.8
Bypass motor	quantity	1	Tank capacity	gallons	6.6
Power	watts	1000	Cord length	feet	30
Current draw	amps	9	Dimensions (l x w x h)	inches	19.7 x 21.6 x 37.4
Waterlift, max.	inches H ₂ O	93	Weight	lbs.	57.2
Airflow, max.	cfm	97	Machine inlet	inches	2
Noise level @ 3'3"	dB(A)	76	Filter efficiency, HEPA (MPPS-method)	% @ 0.18 microns	99.995%

FEATURES & BENEFITS

CFM 118

 A newly designed wheeled collection container is easy to remove, lift, carry and empty. The release handle turns into a convenient carrying handle after it is removed from the vacuum.

 An optional container is available for ultra-safe recovery and quick disposal. The container is fitted with an inlet, a paper bag filter and a cap to close the upper inlet of the vacuum. The paper bag filter captures 99.7% of dust, down to and including 0.3 microns. Bag replacement is swift and clean.

 A large main filter provides more surface area for filtering and resists premature clogging. An oversized main filter is also available.

 An external filter shaker handle keeps the main filter free of clogging dust and maintains the vacuum's maximum suction power and filtration performance.

 The bypass motor, with its own cooling air source, protects the motor from clogging and burnout.

 Optional HEPA filter ensures 99.995% of all ultrafine particles, toxic and nuisance, are retained – down to and including 0.18 microns in size.

A container that comes equipped with a convenient paper bag filter is one of the many options of the CFM 118.

OPTIONAL FEATURES AND ACCESSORIES

- HEPA filter
- Oversized main filter
- ABS plastic collection container with lid
- Manometer to monitor suction performance
- Polyliners for easy disposal
- Stainless steel container
- Stainless steel filter chamber
- Various filter materials are available for special applications, including NOMEX® and PVC membrane
- Anti-static filters and accessories
