Linen Cleaning Instructions

Care for use as proofing cloth:

Our linen is 100% un-treated flax material.

Linen does not need to be wash. If you choose to wash it, it will shrink.

When you first receive it, it will be quite stiff. However, after a few uses, it will soften up.

To care for it, when finished using, allow to dry by hanging like a towel.

Use a plastic scraper to gentle scrape off any stuck-on dough.

Once fully dried and cleaned, roll up and store in a clean, dry area.

Care for liners:

Hand wash in cold water. We recommend gentle liquid detergents that do not contain additives, brighteners or bleach. Do not use stain removers.

Wash all items inside out. Do not steam iron.
